

### **Transportation Committee Report to the Board – December 7, 2011**

An update on VDOT plans for the design of the widening of Rt-7 between the DTR and Reston Parkway has been received from the Supervisors office. VDOT has established a working group that will meet regularly next year, probably starting in January, to gather community input into the planning of the widening of Route 7 between Reston Parkway and Jarrett Valley Drive (DTR.) The stretches of Route 7 between Reston Avenue and Reston Parkway and beyond will be designed and constructed earlier and are separately-funded from the longer stretch between Reston Parkway and the DTR. The group will include representatives from MCA, GFCA, Reston Association, Hunter Mill and Dranesville District Office, FDOT and VDOT. Notification of the meetings will be sent to a representative of each of the organizations.
